

Policy

```
classDiagram
    class Policy {
    }
    class RTPolicy {
        -fixed_priority_service_execution : bool
        -bursty_client_requests : bool
    }
    Policy <|-- RTPolicy
```

The diagram shows a class hierarchy. At the top is a class box for ***Policy***, which is divided into three horizontal compartments. Below it is a class box for **RTPolicy**, which is divided into three horizontal compartments. The first compartment of **RTPolicy** contains two attributes: `-fixed_priority_service_execution : bool` and `-bursty_client_requests : bool`. The second compartment is empty. A vertical line with an open triangle arrowhead points from the top of the **RTPolicy** box to the bottom of the **Policy** box, indicating inheritance.

RTPolicy

-fixed_priority_service_execution : bool
-bursty_client_requests : bool
