Professor of Computer Science

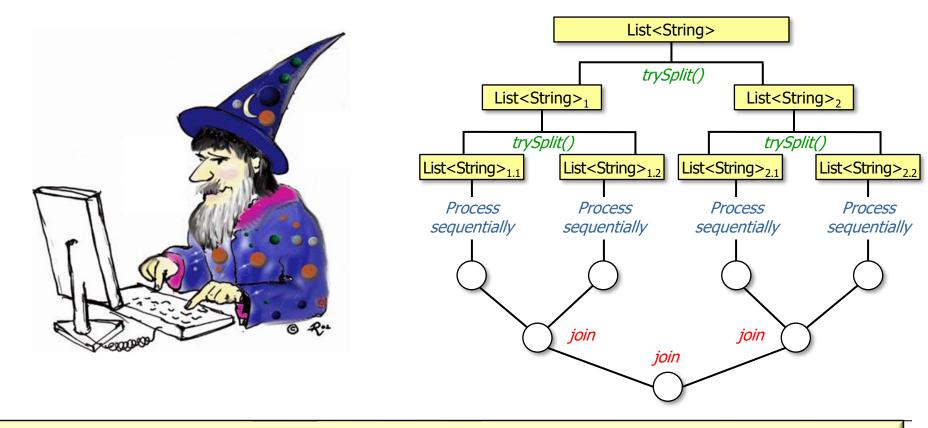

Institute for Software Integrated Systems

Vanderbilt University Nashville, Tennessee, USA

Learning Objectives in this Part of the Lesson

Understand parallel stream internals

See developer.ibm.com/languages/java/articles/j-java-streams-3-brian-goetz

Learning Objectives in this Part of the Lesson

- Understand parallel stream internals, e.g.
 - Know what can change & what can't

 Converting a Java sequential stream to a parallel stream is usually quite straightforward

Changing stream() calls to

parallelStream() calls

involves minuscule effort!!

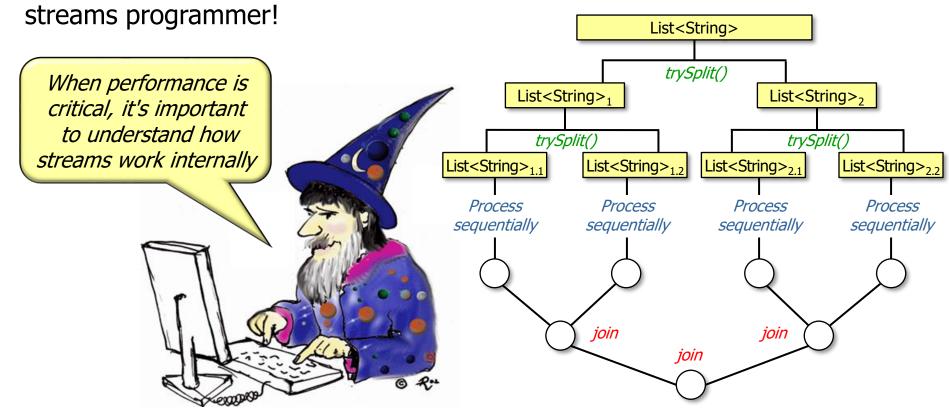

```
return getInput()
    .stream()
    .map(this::processInput)
    .collect(toList());
VS
List<List<SearchResults>>
            processStream() {
  return getInput()
    .parallelStream()
    .map(this::processInput)
```

processStream() {

List<List<SearchResults>>

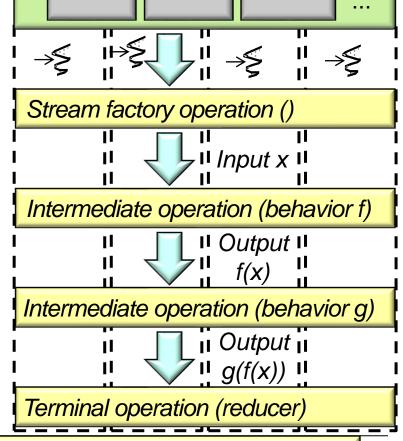

.collect(toList());

 However, knowledge of parallel streams internals will make you a better Java streams programmer!

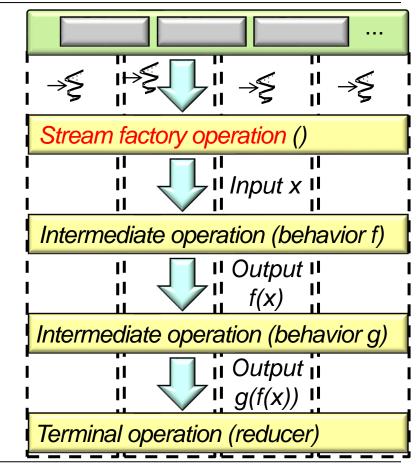

See developer.ibm.com/languages/java/articles/j-java-streams-3-brian-goetz

Recall the 3 phases of a Java parallel stream

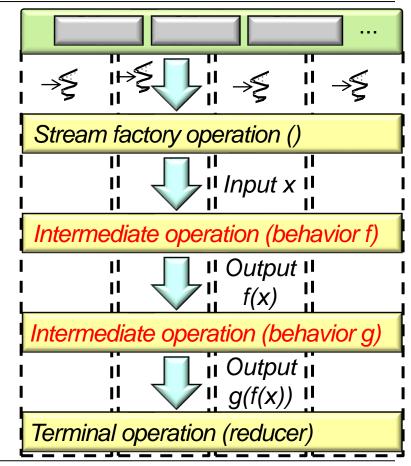

- Recall the 3 phases of a Java parallel stream
 - Split Uses a spliterator to partition a data source into multiple chunks

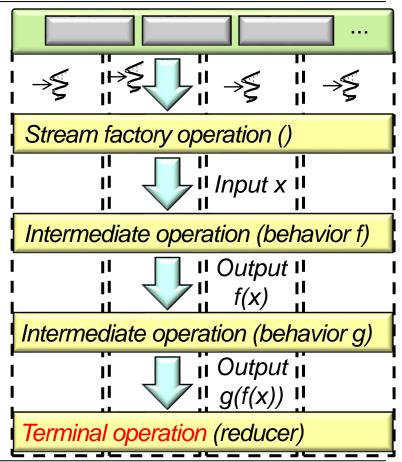

- Recall the 3 phases of a Java parallel stream
 - Split Uses a spliterator to partition a data source into multiple chunks
 - Apply Independently processes these chunks in the common fork-join pool

- Recall the 3 phases of a Java parallel stream
 - Split Uses a spliterator to partition a data source into multiple chunks
 - Apply Independently processes these chunks in the common fork-join pool
 - Combine Joins partial sub-results into a single result

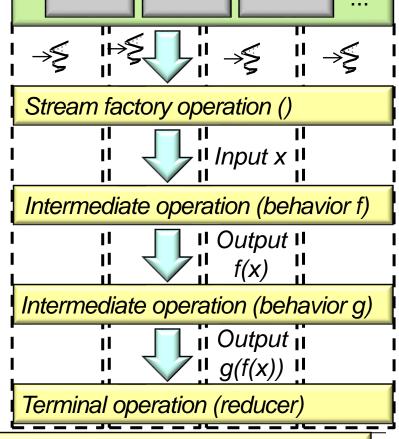

- Recall the 3 phases of a Java parallel stream
 - Split Uses a spliterator to partition a data source into multiple chunks
 - Apply Independently processes these
 - chunks in the common fork-join pool
 Combine Joins partial sub-results into a single result

2m to know the difference.

GOD, grant me

Serenity to ACCEPT the things
I cannot change,

OURAGE to CHANGE
the things I can, and

It's important to which of these phases you can control & which you can't!
