Nashville, Tennessee, USA**

# Learning Objectives in this Part of the Lesson

- Understand the structure & functionality of BerraQuoteClient & BerraQuoteProxy classes that send/receive HTTP GET requests/responses to/from the microservice

---

# The Structure & Functionality of BerraQuoteClient Class

# The Structure & Functionality of BerraQuoteClient Class

---

- The BerraQuoteClient class performs synchronous remote method invocations on the BerraQuoteController microservice to request Yogi Berra quotes

```
@Component
public class BerraQuotesClient
    @Autowired BerraQuotesProxy mQuotesProxy;

    ...
}
```

# The Structure & Functionality of BerraQuoteClient Class

- The BerraQuoteClient class performs synchronous remote method invocations on the BerraQuoteController microservice to request Yogi Berra quotes

**@Component**

```
public class BerraQuotesClient
    @Autowired BerraQuotesProxy mQuotesProxy;

    ...
}
```

*This annotation enables the auto-detection & auto-wiring of dependent implementation classes via classpath scanning*

# The Structure & Functionality of BerraQuoteClient Class

- The BerraQuoteClient class performs synchronous remote method invocations on the BerraQuoteController microservice to request Yogi Berra quotes

```
@Component
public class BerraQuotesClient
    @Autowired BerraQuotesProxy mQuotesProxy;
    ...
}
```

*This field is auto-wired by Spring's dependency injection framework*

# The Structure & Functionality of BerraQuoteClient Class

- The BerraQuoteClient class performs synchronous remote method invocations on the BerraQuoteController microservice to request Yogi Berra quotes

```
@Component
public class BerraQuotesClient
    public List<Quote> getAllQuotes
        (Integer strategy)
    { return mQuoteProxy
        .getAllQuotes (strategy); }

    public List<Quote> getQuotes
        (Integer strategy,
         List<Integer> quoteIds) {
        return mQuoteProxy.getQuotes
            (strategy, quoteIds);
    } ...
```

*Get a List containing  
all Quote objects*

# The Structure & Functionality of BerraQuoteClient Class

- The BerraQuoteClient class performs synchronous remote method invocations on the BerraQuoteController microservice to request Yogi Berra quotes

```
@Component
public class BerraQuotesClient
    public List<Quote> getAllQuotes
        (Integer strategy)
    { return mQuoteProxy
        .getAllQuotes(strategy); }

    public List<Quote> getQuotes
        (Integer strategy,
         List<Integer> quoteIds) {
    return mQuoteProxy.getQuotes
        (strategy, quoteIds);
    } ...
```

*Get a List containing the requested Quote objects*

---

# The Structure & Functionality of BerraQuoteProxy Class

# The Structure & Functionality of the BerraQuoteProxy Class

---

- BerraQuotesProxy hides details of remote method invocations via HTTP

`@Component`

```
public class BerraQuotesProxy {  
    @Autowired RestTemplate mRestTemplate;  
  
    ...  
}
```

# The Structure & Functionality of the BerraQuoteProxy Class

- BerraQuotesProxy hides details of remote method invocations via HTTP

**@Component**

```
public class BerraQuotesProxy {  
    @Autowired RestTemplate mRestTemplate;  
  
    ...  
}
```

*This annotation enables the auto-detection & wiring of dependent implementation classes via classpath scanning*

# The Structure & Functionality of the BerraQuotesProxy Class

- BerraQuotesProxy hides details of remote method invocations via HTTP

@Component

```
public class BerraQuotesProxy {  
    @Autowired RestTemplate mRestTemplate;  
  
    ...  
}
```

*This field is auto-wired by Spring's dependency injection framework*

# The Structure & Functionality of the BerraQuoteProxy Class

- BerraQuotesProxy hides details of remote method invocations via HTTP

@Component

```
public class BerraQuotesProxy {  
    ...  
    public List<Quote> getAllQuotes (Integer strategy) {  
    ... }  
  
    public List<Quote> getQuotes  
        (Integer strategy,  
         List<Integer> quoteIds) { ... }  
  
    public List<Quote> searchQuotes  
        (Integer strategy,  
         String query) { ... }  
    ...  
}
```

*These proxy methods shield clients from low-level details of HTTP programming*

# The Structure & Functionality of the BerraQuoteProxy Class

- BerraQuotesProxy hides details of remote method invocations via HTTP

@Component

```
public class BerraQuotesProxy {  
    ...  
    public List<Quote> getAllQuotes(Integer strategy) {  
        var uri = UriComponentsBuilder  
            .fromPath(GET_ALL_QUOTES)  
            .query("strategy", strategy)  
            .build().toUriString();  
  
        return WebUtils  
            .makeGetRequestList(mRestTemplate, uri, Quote[].class);  
    }  
}
```

*Indicate the strategy the server should use to provide all quotes*

# The Structure & Functionality of the BerraQuoteProxy Class

- BerraQuotesProxy hides details of remote method invocations via HTTP

@Component

```
public class BerraQuotesProxy {  
    ...  
    public List<Quote> getAllQuotes(Integer strategy) {  
        var uri = UriComponentsBuilder  
            .fromPath(GET_ALL_QUOTES)  
            .query("strategy", strategy)  
            .build().toUriString();  
  
        return WebUtils  
            .makeGetRequestList(mRestTemplate, uri, Quote[].class);  
    }  
}
```

*Create a URI passed in an HTTP GET request to get all the Berra quotes*

e.g., `/all_quotes?strategy=0`

# The Structure & Functionality of the BerraQuoteProxy Class

- BerraQuotesProxy hides details of remote method invocations via HTTP

@Component

```
public class BerraQuotesProxy {  
    ...  
    public List<Quote> getAllQuotes(Integer strategy) {  
        var uri = UriComponentsBuilder  
            .fromPath(GET_ALL_QUOTES)  
            .query("strategy", strategy)  
            .build().toUriString();  
  
        return WebUtils  
            .makeGetRequestList(mRestTemplate, uri, Quote[].class);  
    }  
}
```

*Make an HTTP GET call to the server at the designed URL to get all the quotes*

e.g., [http://localhost:9102/all\\_quotes?strategy=0](http://localhost:9102/all_quotes?strategy=0)

# The Structure & Functionality of the BerraQuoteProxy Class

- BerraQuotesProxy hides details of remote method invocations via HTTP

@Component

```
public class BerraQuotesProxy {  
    ...  
    public List<Quote> getQuotes(Integer strategy,  
                                  List<Integer> quoteIds) {  
        var uri = UriComponentsBuilder  
            .fromPath(GET_QUOTES)  
            .query("strategy", strategy)  
            .queryParams("quoteIds", WebUtils  
                .list2String(quoteIds))  
            .build().toUriString();  
        return WebUtils  
            .makeGetRequestList(mRestTemplate, uri, Quote[].class);  
    }  
}
```

*Indicate the strategy & the  
List of requested Quote IDs*

# The Structure & Functionality of the BerraQuoteProxy Class

- BerraQuotesProxy hides details of remote method invocations via HTTP

@Component

```
public class BerraQuotesProxy {  
    ...  
    public List<Quote> getQuotes(Integer strategy,  
                                  List<Integer> quoteIds) {  
        var uri = UriComponentsBuilder  
            .fromPath(GET_QUOTES)  
            .query("strategy", strategy)  
            .queryParams("quoteIds", WebUtils  
                .list2String(quoteIds))  
            .build().toUriString();  
        return WebUtils  
            .makeGetRequestList(mRestTemplate, uri, Quote[].class);  
    }  
}
```

*Create a URI passed in an HTTP GET request to get requested Berra quotes*

e.g., /quotes?strategy=0&quoteIds=15,2,29,40,17

# The Structure & Functionality of the BerraQuoteProxy Class

- BerraQuotesProxy hides details of remote method invocations via HTTP

@Component

```
public class BerraQuotesProxy {  
    ...  
    public List<Quote> getQuotes(Integer strategy,  
                                  List<Integer> quoteIds) {  
        var uri = UriComponentsBuilder  
            .fromPath(GET_QUOTES)  
            .query("strategy", strategy)  
            .queryParams("quoteIds", WebUtils  
                .list2String(quoteIds))  
            .build().toUriString();  
        return WebUtils  
            .makeGetRequestList(mRestTemplate, uri, Quote[].class);  
    }  
}
```

*Make an HTTP GET call to the server at the designed URL to get the requested quotes*

e.g., <http://localhost:9102/quotes?strategy=0&quoteIds=15,2,29,40,17>

# The Structure & Functionality of the BerraQuoteProxy Class

- BerraQuotesProxy hides details of remote method invocations via HTTP

@Component

```
public class BerraQuotesProxy {  
    ...  
    public List<Quote> searchQuotes(Integer strategy,  
                                     String query) {  
        var uri = UriComponentsBuilder  
            .fromPath(GET_SEARCH + query)  
            .query("strategy", strategy)  
            .build().toUriString();  
  
        return WebUtils  
            .makeGetRequestList(mRestTemplate, uri, Quote[].class);  
    }  
}
```

*Indicate the strategy &  
a single query string*

# The Structure & Functionality of the BerraQuoteProxy Class

- BerraQuotesProxy hides details of remote method invocations via HTTP

@Component

```
public class BerraQuotesProxy {  
    ...  
    public List<Quote> searchQuotes(Integer strategy,  
                                     String query) {  
        var uri = UriComponentsBuilder  
            .fromPath(GET_SEARCH + query)  
            .query("strategy", strategy)  
            .build().toUriString();  
  
        return WebUtils  
            .makeGetRequestList(mRestTemplate, uri, Quote[].class);  
    }  
}
```

*Create a URI passed in an HTTP GET request to match the requested query*

e.g., /search\_quote/Baseball?strategy=0

# The Structure & Functionality of the BerraQuoteProxy Class

- BerraQuotesProxy hides details of remote method invocations via HTTP

@Component

```
public class BerraQuotesProxy {  
    ...  
    public List<Quote> searchQuotes(Integer strategy,  
                                     String query) {  
        var uri = UriComponentsBuilder  
            .fromPath(GET_SEARCH + query)  
            .query("strategy", strategy)  
            .build().toUriString();  
  
        return WebUtils  
            .makeGetRequestList(mRestTemplate, uri, Quote[].class);  
    }  
}
```

*Make an HTTP GET call to the server at the designed URL to match the requested query*

e.g., [http://localhost:9102/search\\_quote/Baseball?strategy=0](http://localhost:9102/search_quote/Baseball?strategy=0)

# The Structure & Functionality of the BerraQuoteProxy Class

- BerraQuotesProxy hides details of remote method invocations via HTTP

@Component

```
public class BerraQuotesProxy {  
    ...  
    public List<Quote> searchQuotes(Integer strategy,  
                                     List<String> queries) {  
        var uri = UriComponentsBuilder  
            .fromPath(GET_SEARCHES)  
            .query("strategy", strategy)  
            .query("queries", list2String(queries))  
            .build().toUriString();  
  
        return WebUtils  
            .makeGetRequestList(mRestTemplate, uri, Quote[].class);  
    }  
}
```

*Indicate the strategy &  
a List of query strings*

e.g., /search\_quotes?strategy=0&queries=baseball,game

# The Structure & Functionality of the BerraQuoteProxy Class

- BerraQuotesProxy hides details of remote method invocations via HTTP

@Component

```
public class BerraQuotesProxy {  
    ...  
    public List<Quote> searchQuotes(Integer strategy,  
                                     List<String> queries){  
        var uri = UriComponentsBuilder  
            .fromPath(GET_SEARCHES)  
            .query("strategy", strategy)  
            .query("queries", list2String(queries))  
            .build().toUriString();  
        return WebUtils  
            .makeGetRequestList(mRestTemplate, uri, Quote[].class);  
    }  
}
```

*Create a URI passed in an HTTP GET request to match the requested queries*

e.g., /search\_quotes?strategy=0&queries=baseball,game

# The Structure & Functionality of the BerraQuoteProxy Class

- BerraQuotesProxy hides details of remote method invocations via HTTP

@Component

```
public class BerraQuotesProxy {  
    ...  
    public List<Quote> searchQuotes(Integer strategy,  
                                     List<String> queries){  
        var uri = UriComponentsBuilder  
            .fromPath(GET_SEARCHES)  
            .query("strategy", strategy)  
            .query("queries", list2String(queries))  
            .build().toUriString();  
        return WebUtils  
            .makeGetRequestList(mRestTemplate, uri, Quote[].class);  
    }  
}
```

*Make an HTTP GET call to the server at the designed URL to match the requested query*

e.g., [http://localhost:9102/search\\_quotes?strategy=0&queries=baseball,game](http://localhost:9102/search_quotes?strategy=0&queries=baseball,game)
