

## STL Ordered Associative Container: set

- An `std::set` is an ordered collection of unique keys
  - e.g., a set of student id #'s

```
#include <iostream>
#include <iterator>
#include <set>
using namespace std;

int main () {
    set<int> s; set<int>::iterator it;

    for (int i = 1; i <= 5; i++)
        s.insert(i * 10);
    auto ret = s.insert(20);
    if (ret.second == false)
        it = ret.first;

    copy (s.begin (), s.end (),
          ostream_iterator<int>(cout, " "));
    ...
}
```
